MINI X-RAY

Austin Art Garage

austinartgarage.com · Austin, Texas. Your store seen the way a shopper sees it on a phone.

Your homepage in our phone test

60/100

Four areas, 25 points each. Support is where the most points are left.

Speed 8/25

Lighthouse speed score 21–34 out of 100 in our three runs; the main content showed after 4.9–26 seconds.

SEO 22/25

9 of 10 Lighthouse SEO checks pass; some links can't be followed by Google. Your sitemap also lists one page that looks like test or duplicate leftovers: /pages/artist-collections-2.

Menu 25/25

We couldn't count the menu links automatically, so no points are taken off.

Support 5/25

No chat or assistant on mobile, and no customer reviews on the product page we checked.

The 3 fixes we'd make first

1 Quick questions have nowhere to go

A question that waits for an email reply is a sale on hold, and many shoppers move on while they wait. An answer in the moment keeps them on the page.

No chat
on the pages we checked

2 Product pages don't show customer reviews

First-time visitors don't know your store yet. Reviews from other buyers are the quickest proof that a product is what it looks like, so fewer people leave to look for that proof elsewhere.

No reviews
on the product page we checked

3 The homepage is heavy for a phone

Everything on the page has to come down a phone connection before it settles. A lighter page shows products sooner and uses less of the shopper's data.

THE 3 FIXES, IN DETAIL

1 Quick questions have nowhere to go

WHAT WE SAW We didn't find a chat or assistant on mobile, so a shopper with a quick question about shipping or a product has to email and wait. We checked the homepage and a product page on a phone-sized screen (390 pixels wide), scrolled to the bottom.

WHAT TO DO Add a chat that answers from your own shipping, returns and product pages, day and night, and passes anything else to your team by email. Start with the questions you already get most.

None
chat or assistant on the homepage or product page

2 Product pages don't show customer reviews

WHAT WE SAW We didn't see customer reviews on your product pages. For a first-time visitor, reviews are the quickest proof. We looked for a review widget, star ratings and review counts on the homepage and a product page after they fully loaded on a phone.

WHAT TO DO Turn on a reviews app, ask recent buyers for a review by email a few days after delivery, and show the star rating next to the price.

None
reviews or stars on the product page we checked

3 The homepage is heavy for a phone

WHAT WE SAW The homepage downloads about 10 MB on a phone, most of it images that could be much lighter. In our runs the homepage was 10.2 MB over 469 to 483 requests; images were 6.6 MB of it and scripts 1.9–2.0 MB.

WHAT TO DO Resize and compress the images for phones (Lighthouse estimates 5.7 MB saved on images alone), and remove app code the page downloads but doesn't use (about 0.4 MB by Lighthouse's count).

10.2 MB
homepage download

6.6 MB
of it images

1.9–2.0 MB
of it scripts

0.4 MB
of scripts unused

What's already working

- **Alt text on every homepage image.** Good for Google and for screen readers.
- **A title and description for Google.** The homepage has both, so search results read well.

How we measured. Google Lighthouse 12.8.2 in mobile mode (a simulated mid-range phone on slow 4G): three runs on the homepage on November 3, 2026. Menu links counted from the homepage code; chat and reviews checked on the homepage and a product page in Chrome at 390 pixels wide, November 3, 2026; sitemap read November 3, 2026. Load times vary between runs, so we show ranges and score the better run. Speed = Lighthouse performance × 0.25; SEO = Lighthouse SEO × 0.25 minus 1 per leftover page; Menu and Support start at 25 and lose points only for the gaps named above.
