MINI X-RAY

Saltstone Ceramics

saltstoneceramics.com · Seattle, Washington. Your store seen the way a shopper sees it on a phone.

Your homepage in our phone test

55/100

Four areas, 25 points each. Speed is where the most points are left.

Speed 2/25

Lighthouse speed score 8 out of 100 in our two runs; the main image showed after 13–14 seconds.

SEO 23/25

9 of 10 Lighthouse SEO checks pass; some links only say things like “click here”.

Menu 25/25

23 links in the menu: short enough to scan on a phone.

Support 5/25

No chat or assistant on mobile, and no customer reviews on the product page we checked.

The 3 fixes we'd make first

1 The homepage is slow to show its main image

Most shoppers find you on a phone. While the first screen is still loading, some of them tap back to the search results and pick another store.

13–14 s
main image on a phone

2 Quick questions have nowhere to go

A question that waits for an email reply is a sale on hold, and many shoppers move on while they wait. An answer in the moment keeps them on the page.

No chat
on the pages we checked

3 Product pages don't show customer reviews

First-time visitors don't know your store yet. Reviews from other buyers are the quickest proof that a product is what it looks like, so fewer people leave to look for that proof elsewhere.

No reviews
on the product page we checked

THE 3 FIXES, IN DETAIL

1 The homepage is slow to show its main image

WHAT WE SAW On a phone, your homepage took about 13 seconds to show its main image in our test. Google rates anything over 4 seconds as poor. Across two test runs it ranged from 13 to 14 seconds. The largest thing on the first screen is a slide in a rotating banner.

WHAT TO DO Swap the rotating banner for one image sized for phones and load it first, then go through the 10 outside services that load on the homepage, remove the ones you no longer use and load the rest after the page appears.

13–14 s
main image on a phone

6.1 MB
homepage download

471–479
requests on the homepage

10
outside services

2 Quick questions have nowhere to go

WHAT WE SAW We didn't find a chat or assistant on mobile, so a shopper with a quick question about shipping or a product has to email and wait. We checked the homepage and a product page on a phone-sized screen (390 pixels wide), scrolled to the bottom.

WHAT TO DO Add a chat that answers from your own shipping, returns and product pages, day and night, and passes anything else to your team by email. Start with the questions you already get most.

None
chat or assistant on the homepage or product page

3 Product pages don't show customer reviews

WHAT WE SAW We didn't see customer reviews on your product pages. For a first-time visitor, reviews are the quickest proof. We looked for a review widget, star ratings and review counts on the homepage and a product page after they fully loaded on a phone.

WHAT TO DO Turn on a reviews app, ask recent buyers for a review by email a few days after delivery, and show the star rating next to the price.

None
reviews or stars on the product page we checked

What's already working

- **A short menu.** 23 links, easy to scan on a phone.
- **Product data for Google.** Product pages carry schema, so search results can show price and stock.
- **Alt text on every homepage image.** Good for Google and for screen readers.
- **A title and description for Google.** The homepage has both, so search results read well.

How we measured. Google Lighthouse 12.8.2 in mobile mode (a simulated mid-range phone on slow 4G): two runs on the homepage on November 1, 2026. Menu links counted from the homepage code; chat and reviews checked on the homepage and a product page in Chrome at 390 pixels wide, November 1, 2026; sitemap read November 1, 2026. Load times vary between runs, so we show ranges and score the better run. Speed = Lighthouse performance × 0.25; SEO = Lighthouse SEO × 0.25; Menu and Support start at 25 and lose points only for the gaps named above.
