MINI X-RAY

JuJu's Kids Boutique

jujuskidsboutique.com · New Orleans, Louisiana. Your store seen the way a shopper sees it on a phone.

Your homepage in our phone test

73/100

Four areas, 25 points each. Speed is where the most points are left.

Speed — 15/25

Lighthouse speed score 53–59 out of 100 in our two runs; the main content showed after 2.3–3.1 seconds.

SEO — 24/25

All 10 of Lighthouse's SEO checks pass on the homepage. Your sitemap also lists one page that looks like test or duplicate leftovers: /pages/html-sitemap-products-1.

Menu — 17/25

55 links once the dropdowns open: a long scroll on a phone.

Support — 17/25

Chat (Shopify Inbox) is there for questions, but the product page we checked shows no customer reviews.

The 3 fixes we'd make first

1 The menu is a long scroll on a phone

A shopper who can't spot their category in a few seconds tends to leave. A shorter menu gets more people onto product pages, where buying starts.

55
links in the menu

2 Product pages don't show customer reviews

First-time visitors don't know your store yet. Reviews from other buyers are the quickest proof that a product is what it looks like, so fewer people leave to look for that proof elsewhere.

No reviews
on the product page we checked

3 The homepage is heavy for a phone

Everything on the page has to come down a phone connection before it settles. A lighter page shows products sooner and uses less of the shopper's data.

homepage download

THE 3 FIXES, IN DETAIL

1 The menu is a long scroll on a phone

WHAT WE SAW The main menu has 55 links once the dropdowns open. On a phone, that's a long scroll before anyone reaches a product. We counted the links in the header menu with its dropdowns open, leaving out social icons.

WHAT TO DO Keep 5 to 7 top-level items that match how people shop (categories, best sellers, gifts) and move the long lists into collection pages with filters. Keep search one tap away.

55	994
links in the menu	products in the store

2 Product pages don't show customer reviews

WHAT WE SAW We didn't see customer reviews on your product pages. For a first-time visitor, reviews are the quickest proof. We looked for a review widget, star ratings and review counts on the homepage and a product page after they fully loaded on a phone.

WHAT TO DO Turn on a reviews app, ask recent buyers for a review by email a few days after delivery, and show the star rating next to the price.

None
reviews or stars on the product page we checked

3 The homepage is heavy for a phone

WHAT WE SAW The homepage downloads about 8 MB on a phone, which is heavy on a mobile connection. In our runs the homepage was 7.6 MB over 695 to 698 requests; images were 2.1 MB of it and scripts 3.3 MB.

WHAT TO DO Load images below the first screen only when the shopper scrolls to them, and remove app code the page downloads but doesn't use (about 0.6 MB by Lighthouse's count).

7.6 MB	2.1 MB
homepage download	of it images
3.3 MB	**0.6 MB**

What's already working

- **A chat on mobile.** Shopify Inbox is one tap away on the homepage and product pages.
- **Google's SEO basics.** All 10 Lighthouse SEO checks pass on the homepage.
- **Product data for Google.** Product pages carry schema, so search results can show price and stock.
- **A page that holds still.** Layout shift 0.00, under Google's 0.1 limit: nothing jumps under the thumb.

How we measured. Google Lighthouse 12.8.2 in mobile mode (a simulated mid-range phone on slow 4G): two runs on the homepage on November 9, 2026. Menu links counted from the homepage code; chat and reviews checked on the homepage and a product page in Chrome at 390 pixels wide, November 9, 2026; sitemap read November 9, 2026. Load times vary between runs, so we show ranges and score the better run. Speed = Lighthouse performance × 0.25; SEO = Lighthouse SEO × 0.25 minus 1 per leftover page; Menu and Support start at 25 and lose points only for the gaps named above.
