MINI X-RAY

Foreall

foreall.com · Riverton, Utah. Your store seen the way a shopper sees it on a phone.

Your homepage in our phone test

56/100

Four areas, 25 points each. Speed is where the most points are left.

Speed 6/25

Lighthouse speed score 23–25 out of 100 in our two runs; the main image showed after 18 seconds.

SEO 25/25

All 10 of Lighthouse's SEO checks pass on the homepage.

Menu 8/25

290 links once the dropdowns open: a long scroll on a phone.

Support 17/25

A chat is there for questions, but the product page we checked shows no customer reviews.

The 3 fixes we'd make first

1 The homepage is slow to show its main image

Most shoppers find you on a phone. While the first screen is still loading, some of them tap back to the search results and pick another store.

18 s
main image on a phone

2 The menu is a long scroll on a phone

A shopper who can't spot their category in a few seconds tends to leave. A shorter menu gets more people onto product pages, where buying starts.

290
links in the menu

3 Product pages don't show customer reviews

First-time visitors don't know your store yet. Reviews from other buyers are the quickest proof that a product is what it looks like, so fewer people leave to look for that proof elsewhere.

No reviews
on the product page we checked

THE 3 FIXES, IN DETAIL

1 The homepage is slow to show its main image

WHAT WE SAW On a phone, your homepage took about 18 seconds to show its main image in our test. Google rates anything over 4 seconds as poor. It took about 18 seconds in both test runs. The largest thing on the first screen is a slide in a rotating banner.

WHAT TO DO Swap the rotating banner for one image sized for phones and load it first, then go through the 12 outside services that load on the homepage, remove the ones you no longer use and load the rest after the page appears.

18 s main image on a phone	**5.4–5.5 MB** homepage download
550–553 requests on the homepage	**12** outside services

2 The menu is a long scroll on a phone

WHAT WE SAW The main menu has 290 links once the dropdowns open. On a phone, that's a long scroll before anyone reaches a product. We counted the links in the header menu with its dropdowns open, leaving out social icons.

WHAT TO DO Keep 5 to 7 top-level items that match how people shop (categories, best sellers, gifts) and move the long lists into collection pages with filters. Keep search one tap away.

290 links in the menu	**719** products in the store

3 Product pages don't show customer reviews

WHAT WE SAW We didn't see customer reviews on your product pages. For a first-time visitor, reviews are the quickest proof. We looked for a review widget, star ratings and review counts on the homepage and a product page after they fully loaded on a phone.

WHAT TO DO Turn on a reviews app, ask recent buyers for a review by email a few days after delivery, and show the star rating next to the price.

None reviews or stars on the product page we checked

What's already working

- **A chat on mobile.** It's one tap away on the homepage and product pages.
- **Google's SEO basics.** All 10 Lighthouse SEO checks pass on the homepage.
- **Product data for Google.** Product pages carry schema, so search results can show price and stock.

How we measured. Google Lighthouse 12.8.2 in mobile mode (a simulated mid-range phone on slow 4G): two runs on the homepage on November 1, 2026. Menu links counted from the homepage code; chat and reviews checked on the homepage and a product page in Chrome at 390 pixels wide, November 1, 2026; sitemap read November 1, 2026. Load times vary between runs, so we show ranges and score the better run. Speed = Lighthouse performance × 0.25; SEO = Lighthouse SEO × 0.25; Menu and Support start at 25 and lose points only for the gaps named above.
